PERSONAL STATEMENT

I'm a Freelance web Designer and Developer currently based in London. I love everything that has to do with web design & development.

I have over 2 years of experience working in the industry and around 6 months of freelancing. I am a perfectionist, I love beautiful and functional things with no compromise on either.

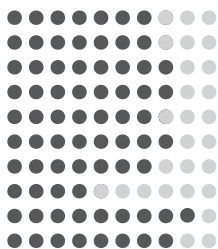

I am a person of a few words but I do listen! So I consider myself great for UX.
I meditate, care deeply for our planet and love my family.
